EXPERIMENT – 07
INTEGRATING ZOHOCREATORWITH ZOHO CRM VIA CONNECTIONS AND APIs

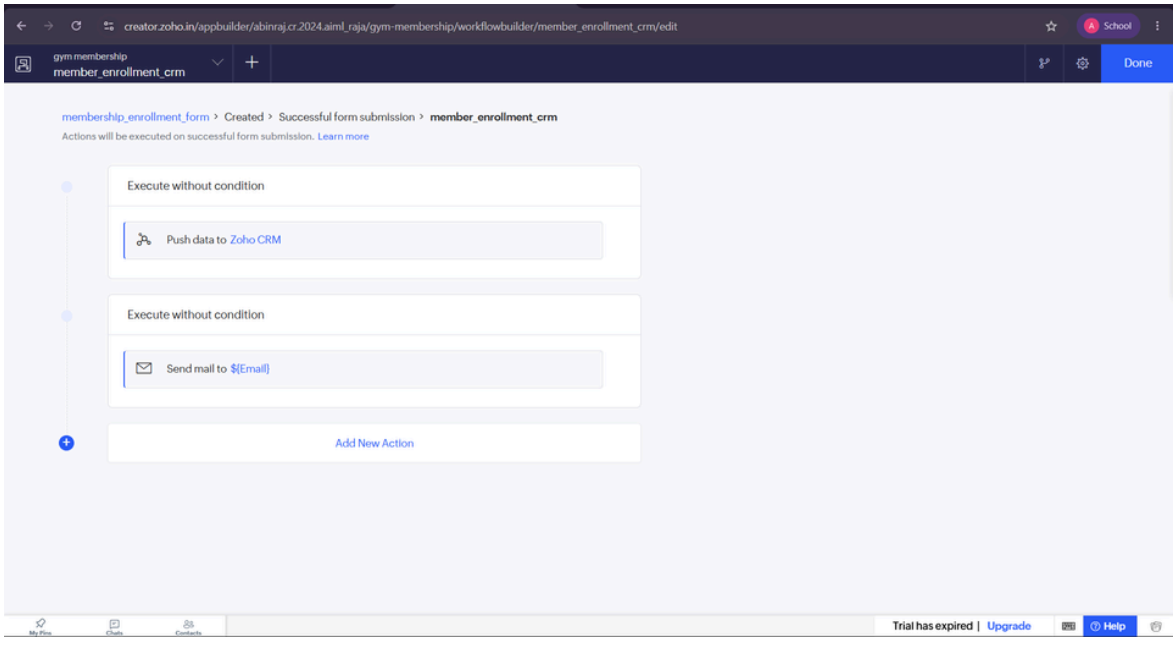

Aim

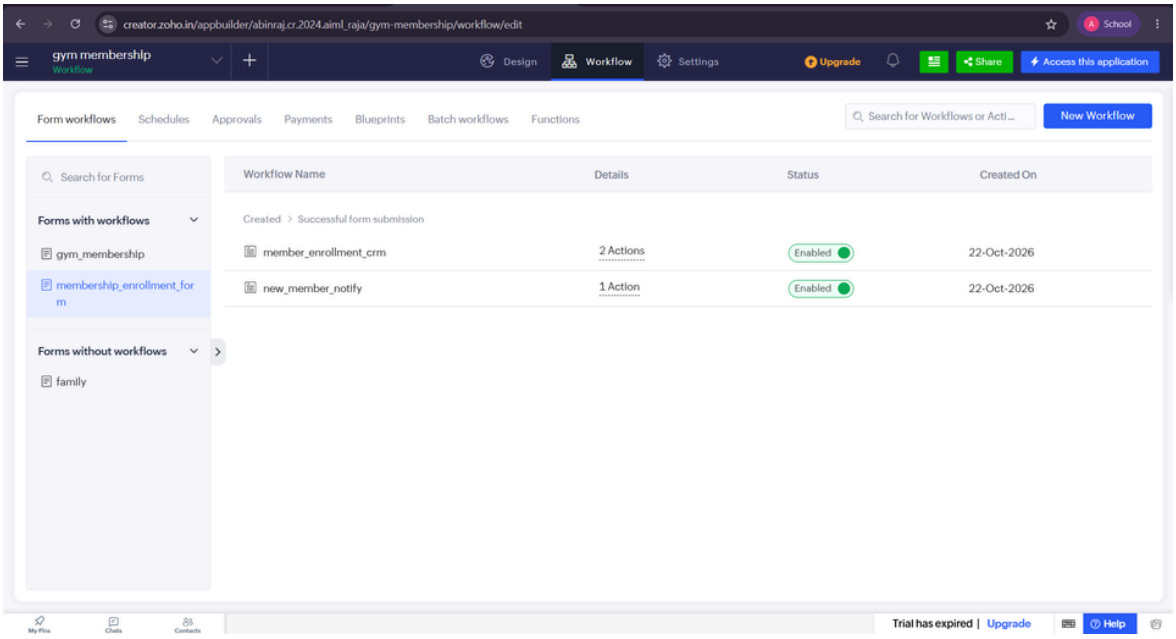

To integrate the Gym Membership Enrollment Form in Zoho Creator with Zoho CRM using authenticated connections and automated workflows for seamless member registration and data synchronization.

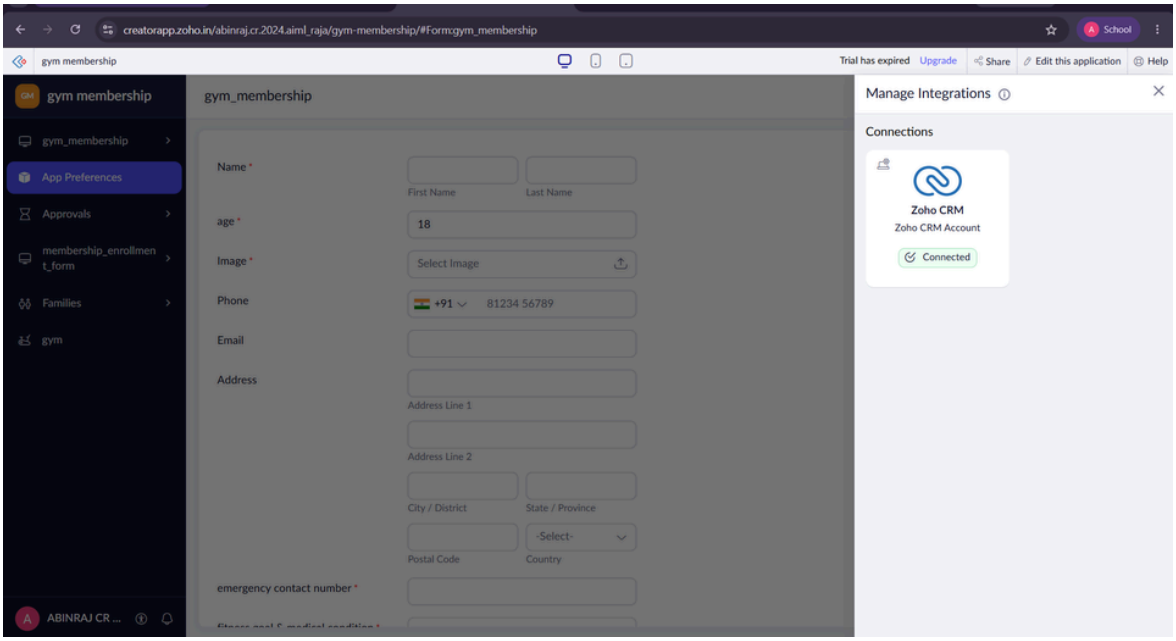

Procedure

1. Application Setup: Log in to Zoho Creator and open the Gym Membership Enrollment application.
2. Form Design: Create the Membership_Enrollment_Form with member details, contact information, membership plan, membership type, preferred start date, and payment details.
3. Integration and Authentication: Navigate to App Settings or Integrations, select Zoho CRM, and establish a secure OAuth connection with the required permissions.
4. Workflow Configuration: Open the Workflow section, select the membership enrollment form, and create a workflow triggered after successful form submission.
5. Action Mapping: Configure the integration action to send member details to the appropriate Zoho CRM module, such as Contacts or Leads, and enable the workflow.

Result

The Gym Membership Enrollment application was designed for integration with Zoho CRM. Once configured and tested, the workflow can synchronize member details from Zoho Creator to the selected CRM module upon successful form submission.
