EXPERIMENT – 08
USER MANAGEMENTAND ROLE-BASEDACCESS CONTROL (RBAC) IN ZOHO CREATOR

Aim

To configure User Management and Role-Based Access Control (RBAC) in the Gym Membership application to secure member information, restrict data access, and assign appropriate permissions to different users.

Workflow

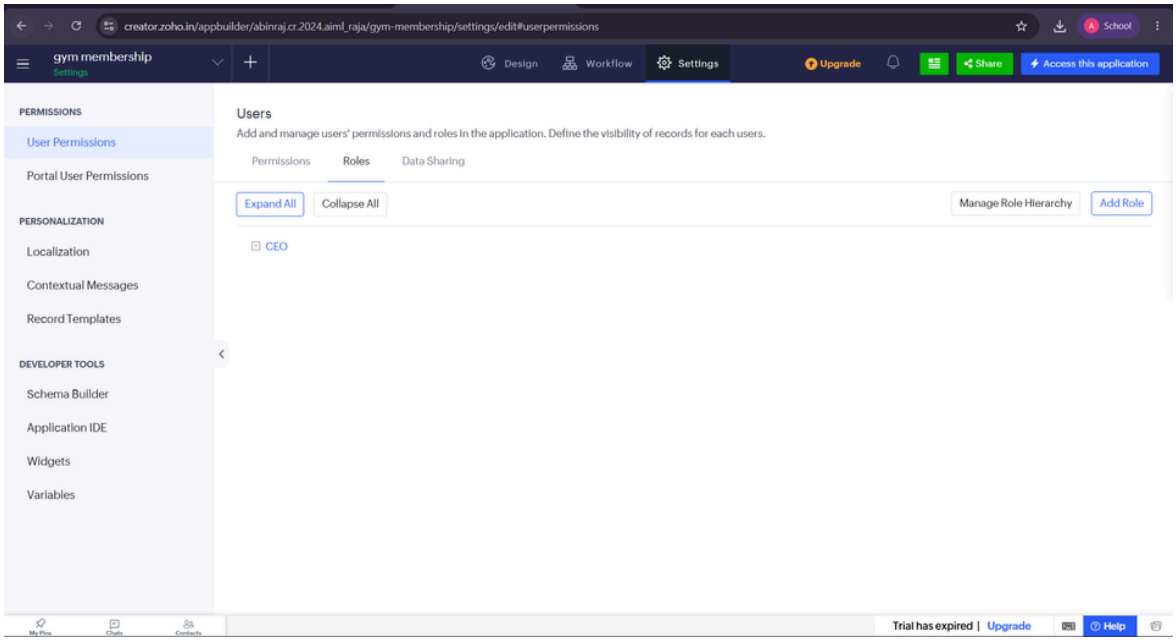

Role-Based Access Control restricts access according to the responsibilities of each user. In the Gym Membership application, three user roles are configured.

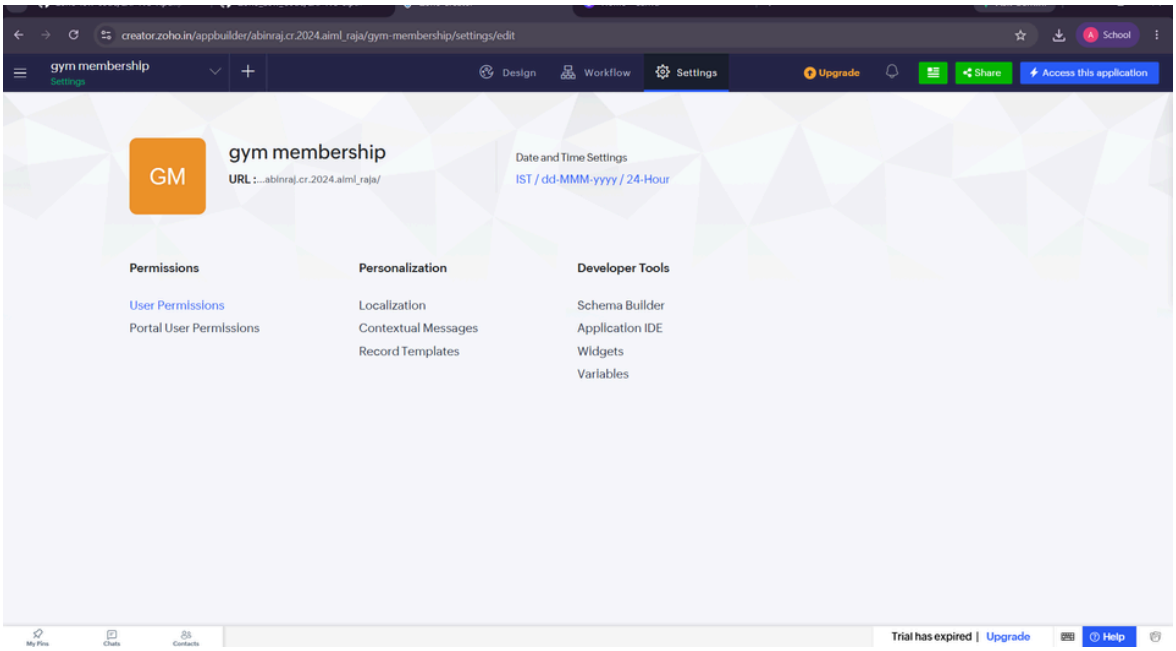

Role Name	Assigned Permissions	Data Access Scope
Administrator	Create, Read, Update, Delete	All gym membership records
Gym Manager	Read, Update, Approve records	Assigned membership and trainer records
Front Desk Staff	Create and Read records	Member enrollment and assigned records

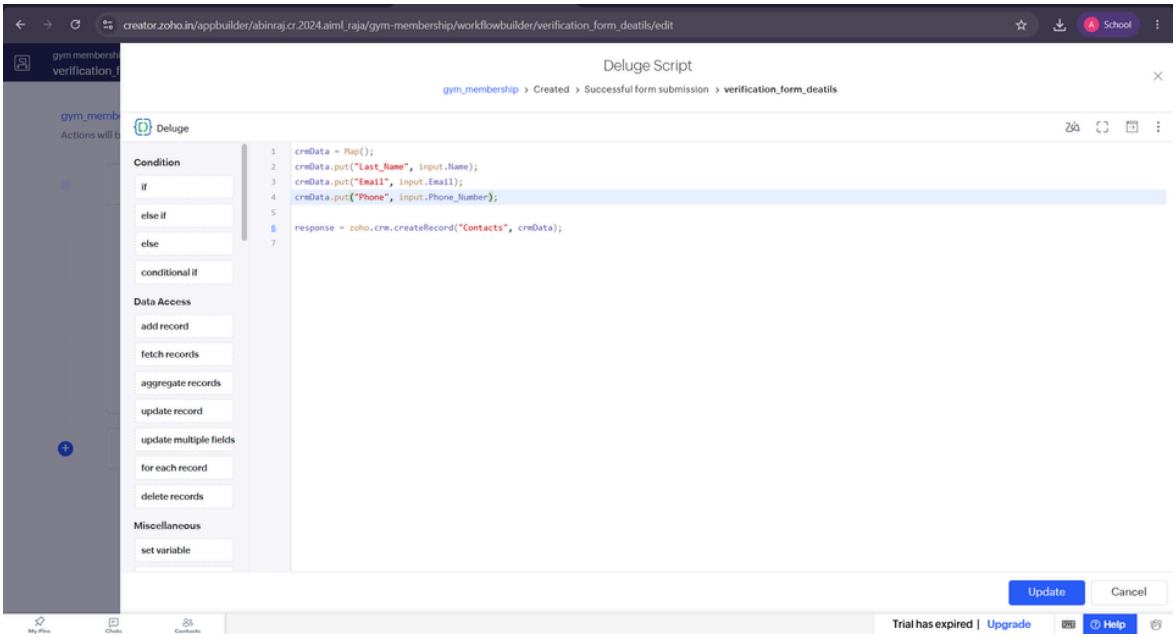

Procedure

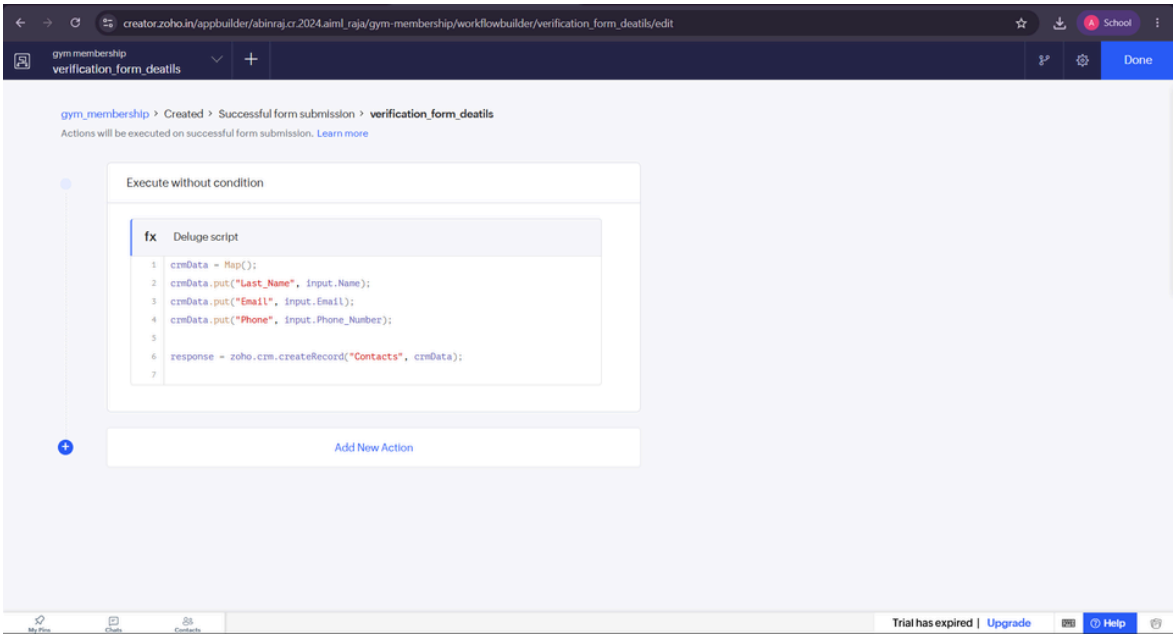

1. Access Developer Mode: Log in to Zoho Creator, open the Gym Membership application, and navigate to Settings.
2. Configure Users and Roles: Open Users & Permissions and create roles for Gym Manager and Front Desk Staff alongside the Administrator role.
3. Define Profiles and Permissions: Configure form and report permissions to control who can view, create, edit, or delete membership records.

Result

User Management and Role-Based Access Control were configured for the Gym Membership application to organize user permissions, protect member information, and provide controlled access to membership records.
